

**ABSTRACT**

CFEM & CTIC workshop:  
Theory and Practice of Secure Multiparty Computation  
May 30 to June 3, 2016  
Aarhus University, Denmark

## Title: Secure Stable and Perfect Matchings

Author: abhi shelat, University of Virginia, USA

I'll finish (and extend) the talk I gave at the last workshop in 2014 concerning Stable Matchings. We can now securely compute on instances the size of the 2016 residency match in 1 day. The insight was to exploit an algorithmic property of matchings and design a new secure computation data structure.
